
Gallagher Alarm Management Solutions

Gallagher's security platform features a fully integrated intruder alarm management system eliminating the need for a separate intruder solution.

The Gallagher Controller 6000¹ provides sophisticated intruder alarm management and will immediately inform you if there's an intruder on the premises, contacting your security staff or monitoring centre to re-secure the site.

A Gallagher security solution allows you to...

- Trigger actions such as the switching on of lights when an intruder is detected
- Configure entry and exit delays to give cardholders time to enter/leave
- Record full event details, including the cardholder's name, for arm/disarm operations
- Communicate alarm transmissions via: TCP/IP, Cellular or Dial-up
- Arm/disarm your alarms at your convenience via a: time schedule, operator override, authorized cardholder, Gallagher reader, keyswitch control, or the Gallagher Remote Arming Terminal
- Configure the system to treat other incidents as an alarm - for example, when the temperature reaches a certain level in a particular area
- Channel all alarms from integrated systems through the Gallagher Command Centre² for appropriate action
- Monitor alarms in the field using the Gallagher Remote Arming Terminal³
- Monitor alarms offsite using Contact ID data format
- Notify cardholders via email or text messages about events and alarms, as well as the imminent expiry of their cards/competencies using the Gallagher Notifications feature⁴
- Configure sites remotely including alarms management for distributed Gallagher systems using the Gallagher Dialler

Worldwide, Gallagher delivers business integrated security management:

- Personnel workflow
- Security and risk management
- Business continuity

▪ **Single scalable platform**

Gallagher Command Centre allows central configuration and management of:

- Access control
- Intruder alarms
- Perimeter security
- Compliance
- Multiple zones within a single site
- Multiple facilities

▪ **Automatically execute business policy** by enforcing compliance with regulation

▪ **Fully integrated intruder alarm management** to channel alarms from integrated systems to Gallagher Command Centre

▪ **Perimeter security solutions** configurable for any type and size of site using multiple technologies

▪ **Networked perimeter security** system with full configuration, control and monitoring through Gallagher Command Centre

Gallagher is a global technology supplier of integrated access control and perimeter protection, encompassing both hardware and software systems, and professional services. Gallagher delivers electronic access control, intruder alarms management, perimeter security and compliance management through a single integration platform.
